

Worksheet 4.2

Name _____

Key signatures are created so that we do not need to write the "accidentals" in the middle of the measures. We can simply rely on them to let us know that all of a certain note are flat or sharp for the entire piece. After you memorize them, they will also help you see what key the piece is in, before you play it.

For the following given scales, draw in the key signatures in the blank provided. Can you see a logical progression in the addition or subtraction of sharps or flats?
